Introduction

The Profile, North Carolina Counties includes economic and demographic indicators for each county where available in twelve major categories: Area; Highway Mileage; Population; Per Capita Income; Voter Registration; Agriculture; Education Enrollment; Employment; Industry-New and Expanded; Total Travelers' Expenditures; and, Sales and Use Tax Collections, and Retail Sales. Some of these categories have sub-categories. The statistical information for each category begins with 1960 or as close to that date as possible. Where NA is shown, the statistical information is either not available at all, or has not yet been compiled for the current year.

The twelve major categories are listed below with their source and any explanatory information necessary.

Area -

Land and Water - N. C. Department of Natural and Economic Resources, Office of Water and Air Resources.

The Hoke County and Moore County areas may vary with other county totals due to the annexation of the Little River Township (approximately 53,000 acres) by Moore County from Hoke County.

Forestry - U. S. Forest Service Bulletin SE-5, 1966, "North Carolina's Timber".

Forest land acreage consists of land at least 10 percent stocked by forest trees of any size, or formerly having such tree cover, and not currently developed for nonforest use.

Cropland and Pastures - N. C. Department of Agriculture, "North Carolina Farm Census Summary".

The acreage for cropland and pastures will overlap with the acreage for forest land in some counties. The "Farm Census Summary" defines a farm tract as any tract or tracts of land with more than one acre of cropland or pasture, more than one sow or cow, more than 100 hens or any combination of these. Note that beginning with 1969, the survey was conducted for tracts of 10 or more acres while previously the farm census was taken from tracts of five or more acres.

Recreation - N. C. Department of Natural and Economic Resources, Division of Recreation. (1971 Survey)

Highway Mileage - North Carolina State Highway Commission, Planning Department.

Figures include paved and unpaved mileage.

Population -

1950, 1960 and 1970 - U. S. Department of Commerce, Bureau of the Census.

Figures are as of April 1.

1965 - Carolina Population Center.

Estimates are as of July 1.

Per Capita Income - N. C. Department of Revenue, Tax Research Division.

Voters Registration - N. C. State Board of Elections.

Agriculture -

Acres of Harvested and Idle Cropland and Farm Population - N. C. Department of Agriculture, "North Carolina Farm Census Summary".

Estimated Farm Income - N. C. Cooperative Agricultural Extension Service.

These estimates of income are for tobacco, cotton, peanuts, corn, grains, potatoes, fruits and vegetables, greenhouse and nursery, hay and other crops, livestock products, and government payments.

Education Enrollment -

Public Schools - N. C. Department of Public Instruction, Statistical Services.

Community Colleges - N. C. Department of Community Colleges.

Higher Education - The University of North Carolina.

Statewide data does not equal the summation of the figures for all one hundred counties due to the inability to assign a home county to some students.

Motor Vehicles - N. C. Department of Motor Vehicles, Driver Education and Accident Records Division, and the Registration Division.

Employment - N. C. Employment Security Commission, Bureau of Employment Security Research.

In some instances unemployment rates for the years 1970 and 1971 are not strictly comparable to earlier figures due to a revision in the data collection procedures.

Statewide employment figures were developed independently and are not a summation of the county estimates.

Industry - New and Expanded - N. C. Department of Natural and Economic Resources, Division of Commerce and Industry.

Total Travelers' Expenditures - N. C. Department of Natural and Economic Resources, Division of Travel and Promotion.

Expenditure figures refer to the cost of traveling on trips outside the commuting zone or local trade area in the state. This includes trips for all purposes, such as business, pleasure, and personal affairs; and the mileage includes passenger movement on all modes of transportation.

Sales and Use Tax Gross Collections and Gross Retail Sales - N. C. Department of Revenue.

The 1971-72 tax rate for Autos, Planes, and Boats is 2%.
